

# Protect your network with intelligent email filtering

SpamExperts filters millions of domains daily, adapting instantly to new attack patterns—without using customer data.

Deploy in the cloud or on-prem, with enterprise-grade safeguards and seamless integration.

## How it works

A simple record change routes all inbound email through our gateway.

### 1. MX record update

Redirect inbound email to the SpamExperts gateway—no hardware or software required

### 2. Secure routing

Email is routed through the gateway before reaching your mail server

### 3. Real-time threat filtering

Advanced detection blocks spam, phishing, malware, and spoofing attempts

### 4. Self-learning engine

Continuously adapts using global threat data and user feedback

### 5. Clean delivery & quarantine

Legitimate mail is delivered; suspicious messages are quarantined and user manageable

### No infrastructure changes required

Our solution is cloud-based and integrates with your existing email setup

## Filtering Accuracy & Quarantine

High accuracy and zero false positives; it filters threats before they reach your inbox. Suspicious messages are quarantined and fully user manageable.

## Efficiency & Cost Savings

- Lower support load
- Reduce infrastructure strain
- Cut costs while delivering enterprise-grade protection

## Deployment & Integration

- Deploy in the cloud or on-prem
- Integrate with your stack using free plugins or robust APIs
- Autonomous scaling
- Integrate your own branding personality touch with multilingual options

## User Empowerment

- Give users full control
- Live quarantine
- Smart delivery retries

“

The SpamExperts software is extremely useful in preventing outbound spam and has helped us tremendously in maintaining the health of our servers. We are satisfied with our chosen email security solution and we will most likely extend the use of SpamExperts products in the future”

Cody Tan  
CEO, HostWithLove

## Filtering

**Smart scanning:** Detects spam and viruses with advanced algorithms. Add custom rules for precise control over email flow

**Alias sync:** Supports domain/mailbox aliasing with LDAP integration

**Attachment control:** Blocks risky extensions and enforces size limits

**Authentication checks:** Validates senders via SPF, DKIM, and DMARC

## Web Interface

**Multilingual UI:** Brandable interface with role-based access

**Secure login:** LDAP, OAuth2, and optional 2FA support

**HTTPS enforced:** Includes free certificate generation and management

## Integrations

**Plug & play:** Free add-ons for popular control panels and mail tools

**Third-party ready:** Prebuilt connectors for hosting platforms

**Custom API:** Extensive documentation for tailored integrations

## Quarantine

**User control:** Web and IMAP access to view, release, or block messages

**Auto-expiry:** Messages expire automatically unless released

**Mobile access:** Manage quarantine via iOS® and Android® apps

**Custom reports:** Tailored insights into quarantined traffic

## Email Continuity

**Outage resilience:** Stores and retries email delivery during downtime

**Queue management:** Admins can manage and release queued messages

**Compose & reply:** Users can send emails even if primary server is down

### Syllabus

**LDAP integration** = Syncs user and mailbox data with your existing directory

**SPF, DKIM, DMARC:** Email authentication protocols that verify sender identity and prevent spoofing

**IMAP access to view** = Lets users access and manage quarantined emails directly from their email client

SpamExperts is a  
VBSpam+ Award Winner.
